### Exiles of the Stars Andre Norton

The Free Trader starship Lydis is making a run to the Planet Thoth, carrying incense for the great temples of Kartum, when a civil war lands her in a battle of ancient powers and nameless evil with a Forerunner treasure at its heart.

The crew seems normal -- until you look closely at two of its members: Krip Vorlund, a man who walks in a body not his own, and his pet, a four-legged beast hiding the mind of Maelen the Moon Singer, a woman whose esper powers can save them all -- or bring them to eternal destruction.

Enter once again into the World of Moon of Three Rings, in this sequel.

### Obi Wan Kenobi says

I continui riferimenti al passato di alcuni protagonisti, che lasciano intuire grandiose avventure, mi hanno lasciato con un desiderio insoddisfatto di poterle leggere per intero anziché dovermi accontentare dei flashback. A parte questa che considero una nota a margine, resta per me una lettura consigliatissima per chi apprezza il genere Sci-fi.

### Steve Kettmann says

I have fond memories of reading THE ZERO STONE and other Andre Norton in my teens and when I stopped off at used bookstore in San Clemente, CA, and found a batch of old Andre Norton paperbacks, it was fun to grab this one and drive right in - I'd have given another star if it felt like the writing had a less dashed off feel, but the story-telling vibrates with that winning Andre Norton combination of brisk adventure (I was often eager to turn the page to find out what would happen next), simple but winning characters, at least the two main characters, who communicate telepathically, and thumb-scratching what-if big-picture imaginings. I'd recommend this to any fan of Andre Norton.

### Valerie says

Part II of the Krip Vorlund/Maelen books. Body-switching, Forerunners, Free Traders, and experiments (fairly successful) in telling the same story from more than one point of view.

---

### Sally Boyington says

One of the best sci fi sequels ever. Norton keeps her writing simple and compelling, and Krip Vorlund and Maelin are both well drawn, sympathetic characters with enough flaws to keep them human--even when they aren't.

---

### Terry says

Norton's books age fairly well; taking in to account current technology when they were written. She was my first Sci-Fi author back in the 50's and a major influence on many future SF authors.

### Jeff Dickison says

A very good sci-fi story with all of the great Norton attributes: imagination, good plotting, suspense, fascinating aliens, shape-shifting and esp power. Rocket ship gets marooned on what is supposed to be an empty planet but wonderous archaeological artifacts are found, both by the good guys and the bad guys.

---

Highly recommended if you're a Norton fan.

### **Melissa says**

Not as good as the first one in the trilogy (at least I think there is another one). I loved Moon of the Three Rings and even gave it 5 stars which I do rarely. This one has Krip and Maelan off on an adventure on his ship the Lydis. They land on a world that has priests that want them to transport valuable objects but another one who disagrees with this causes their ship to have to make an emergency landing on another planet. Much adventure ensues but it seemed kind of drawn-out. Once again this book was narrated alternately by Krip and Maelan.

### **Cinnamingirl says**

I'm only at the beginning of this, but its already shaping up pretty interestingly. I like how it's immediately a mystery story, and how Norton uses Maelen as an opportunity to discuss philosophy/religion.

### **Ray Savarda says**

OK, wording / language attempts to be different, since it's dealing with alien forms, but it was rather slow reading.
