Everything's better with zombies - not. The electrifying final instalment of Lily Herne's *Mall Rats* series...

Struggling to cope with their physical and mental scars, the remaining Mall Rats limp back home to Cape Town. They think they have the answer to all the enclave's problems. They think they're going to get a hero's welcome. But things have changed since they've been gone. And not for the better...

Meanwhile, the Army of the Left is preparing to wipe out the dead once and for all. Its leaders think they've come up with a faultless plan. They think they have a secret weapon that will set the city free once and for all.

They're wrong.
