Growing up in the magical land of Gammalgard, William Stormhand led the relatively normal life of a farmer's son. Content with working and living in his small world, Will never expected that a trip to the county fair would change everything. Suddenly, at his father's request, Will is summoned to enroll at Bladebeard Academy--the Empire's premiere military academy--where, with the help of some new friends, he hopes to uncover clues about his father's past and to learn to control his newly discovered powers. However, Will quickly finds that he is not without enemies at Bladebeard Academy, making his task difficult. There is more than meets the eye at the Academy, and it's up to Will to stop the growing shadow that's threatening to throw the Academy and the entire Empire into chaos.

Not very original, good story though

It feels like a Harry Potter rip off, in the sense the author set a similar stage, though used a different set of circumstances. I'm hoping he builds up the characters better in future books.

Brightflame follows the POV of a young man named Will. Will attends an academy that caters to help students learn subjects such as war, magic, history ect... While many of the plot twists and story events are telegraphed from the beginning and not to surprising at all, I enjoyed the book. Will is a little too perfect which doesn't bother me personally much but I know others will be turned off by that fact. The supporting characters have depth but you really have to look for it, he would do well to flesh out them more throughout the series. Overall I enjoyed reading the story and will most likely be tackling its sequel soon.

Why did I buy it?

The concept of a school/ Academy within a fantasy setting sounded interesting.

Did you like it?

It was okay. I very much liked the magical beasts described, and characters. One can never be sure this or that character really is what they claim to be. Also I love Vale.

In the beginning I was very annoyed, because somethings just seemed so illogical. I mean William is being described as unconscious - for at least hours if not days. And when he wakes up his family isn't only unconcerned, but want to do him a very important test only 30 minutes later.

Even with healing magic, it seems a bit fast.

Though, the book's quality increased with the page count. These mistakes were all rather in the beginning. What I never really understood in the book is, why his father and mother told him nothing at all.

Best scene of the book?

Let's go with favourite character: Ehan.

Season says

I love books with training aspects, where the MC is not overpowered and has to work for it.

I was excited when I discovered this book, because I binge read ones like these, and since my love for Litrpg soared, very few fantasy aspect books has caught my fancy.

Poor world building, character development and a basic story line kept every page as a thorn in my eye. Will is overpowered from day one, beating up even teachers with no training what so ever.

This is more for Very young adults, and I would not recommend it to even them.

I never write reviews, I think this is my first, but I had to get it out there.

Dear Author, please don't stop writing, you have an amazing imagination, please take this as constructive criticism.
